Networking: LAN/WAN Setup, Routers & Switches, Structured Cabling, Network Monitoring

Development: HTML, CSS, JavaScript, Java, React, MySQL

Support: Ticket Logging, Issue Escalation, Hardware Diagnostics, Systems Documentation

PROFESSIONAL EXPERIENCE

Call Centre Agent Intern, Axe Micro Enterprise Ltd, Thika August 2026 – Present

- Conduct pre-disbursement verifications and fraud checks on loan applications.
- Make welcome calls to clients post-disbursement and educate them on loan terms and repayment schedules.
- Monitor portfolio health through regular client check-ins and identify early warning signals on at-risk accounts.
- Execute collection strategies, negotiate repayment plans, and document default root causes for risk analysis.

- Maintain CRM data accuracy and generate behavioural insights to support sales activities.

Customer Service & Telesales Agent, Zevra Gray Limited, Nairobi July 2026 – August 2026

- Responded to customer inquiries via phone, email, live chat, and SMS on a digital lending platform.
- Guided customers through loan applications, repayments, and account management.
- Resolved complaints and troubleshot app-related issues, escalating technical concerns where necessary.
- Logged all customer interactions accurately in the CRM system and maintained up-to-date records.
- Supported the collections team with repayment reminders, account follow-ups, and telesales activities.

IT Technician (Attachment) Jul – Sep 2024

Zetech University, Ruiru

- Delivered first line IT support across multiple departments, resolving hardware, software, and network faults.
- Configured LAN and wireless networks, including routers, access points, and structured cabling.
- Installed and integrated CCTV systems into the campus network.
- Administered Microsoft 365 accounts and supported staff on Office 365 applications.
- Logged and tracked all support requests, documented resolutions, and maintained accurate ICT asset records.
- Trained staff and students on ICT applications, adapting delivery to different skill levels.

PROJECTS

RedReport – Penetration Testing Report Generator 2025

- Built a web application that generates professional penetration testing reports for security professionals from security assessment findings.
